

Establish relationships with high-impact suppliers

Rapidly assess current performance & agree net zero targets

Introduce the wider Vizibl platform to take meaningful action, now

DATASHEET

Decarbonisation as a Service

Baseline & improve supplier sustainability with programmes aligned to your goals

According to CDP, the clearest differentiator between corporate responders in 2023 will be through their initiatives and collaborations with suppliers on reducing scope 3 emissions in the value chain. And, as governmental and investor pressure also increases on companies to keep the planet in line with below 1.5°C warming, reducing scope 3 impacts is going to be the only option.

However, this is a long journey that has to start today if you're to have any chance of meeting these goals, especially if your organisation has committed to being net zero by 2050. Where do you begin?

Decarbonisation as a Service (DaaS) from Vizibl provides rapid access to our Supplier Sustainability Management solution. Establish relationships with the supplier cohort that represents the majority of your scope 3 emissions, quickly assess performance using pre-configured CDP and SBTi frameworks, and move forward to emissions reduction actions through our Relationship Manager, Collaboration Workspace, and Innovation Hub.

DECARBONISATION AS A SERVICE

Features

-  Establish relationships with the supplier cohort that contribute most to your scope 3 impacts through a combination of the Vizibl platform and our expert enablement services.
-  Instantly access sets of normalised & aggregated data at an individual supplier level or across a set of suppliers from pre-configured frameworks like CDP & SBTi.
-  Create supplier decarbonisation programmes incorporating these frameworks, and set a roadmap of improvement targets towards new or existing net zero goals.
-  Get started right away on taking meaningful actions with your high impact suppliers, establishing a decarbonisation mindset and working towards reduction.
-  Integrate sustainability management with the rest of the Vizibl platform, allowing you to attach projects, initiatives, and innovation opportunities to your programmes.

Benefits

-  Action beats inaction every time. By choosing DaaS from Vizibl and focusing on your highest impact suppliers first, you can go from plan to action faster than ever.
-  Save time manipulating and normalising extensive datasets from common disclosure system providers like CDP and SBTi thanks to out-of-the-box ratings in Vizibl.
-  Switch your focus from lagging to leading metrics by setting a roadmap of incremental targets plotting your course towards a new or established net zero goal.
-  Measure, align, collaborate, and innovate all from one platform, and track suppliers' operational performance, innovation, and sustainability credentials side by side.
-  Gain actionable insights from robust reporting functionality, enabling you to identify areas for improvement & prove your progress towards net zero goals.

About Vizibl

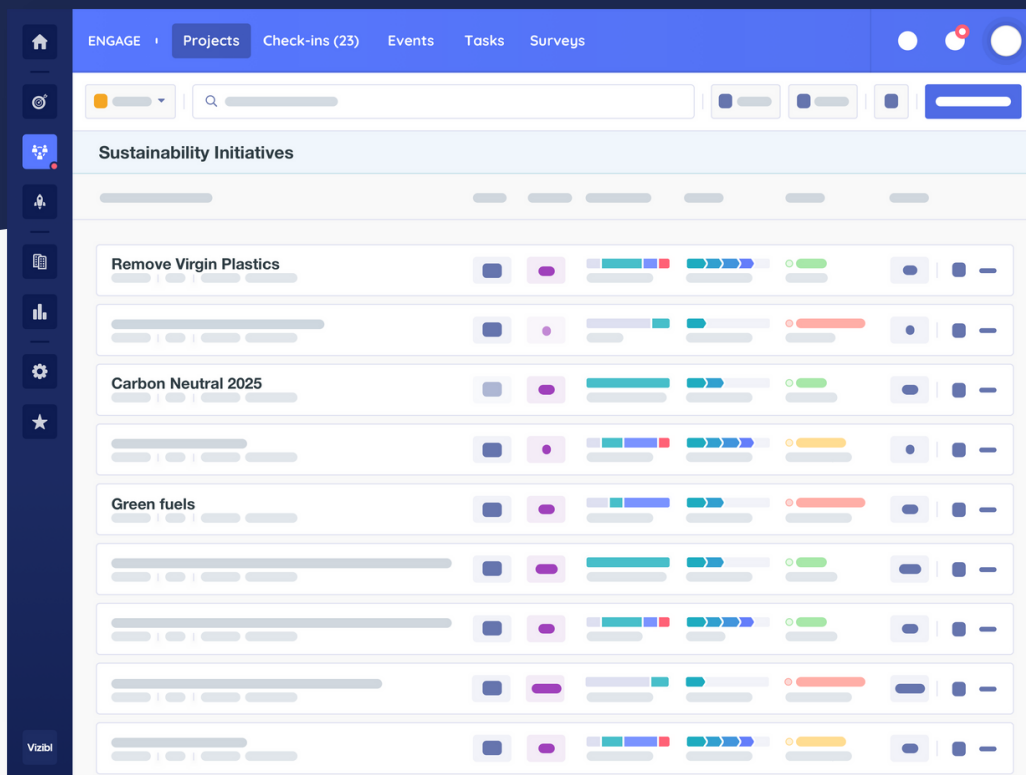

At Vizibl, we put collaboration, innovation, and sustainability at the heart of supplier relationships.

Our best-in-class digital platform enables enterprise organisations and their suppliers to manage every aspect of their relationship more effectively.

Whether it's discovering new revenue streams, developing innovative products and solutions, or taking joint action towards your sustainability targets, Vizibl helps to align your suppliers with your business goals to deliver mutual value.

Trusted by giants in pharmaceuticals, oil & gas, FMCG & communications, the Vizibl platform connects buyers and businesses with their suppliers, on every continent across the world.
