Supplier Sustainability Management

Baseline & improve supplier sustainability
with programmes aligned to your goals

Enterprise organisations are facing pressure from all stakeholders to meet sustainability targets. With most of their impact sitting in the supply chain, working closely with suppliers has become an imperative in order to meet looming deadlines.

But baselining and measuring supplier sustainability is notoriously difficult, and influencing external stakeholders in the supply chain is harder still, obstructing attempts to make concrete progress.

Vizibl Supplier Sustainability Management, a key component of our Supplier Collaboration & Innovation solution, is designed to overcome these common barriers to improved supplier sustainability, providing the tools to create supplier sustainability programmes, measure & baseline performance, set goals & chart a roadmap of targets, and prove sustainability progress over time.

Features

-  Instantly access sets of normalised & aggregated data at an individual supplier level or across a set of suppliers from common disclosure frameworks like CDP & SBTi.
-  Create supplier sustainability programmes incorporating these frameworks, and set a roadmap of improvement targets towards a measurable programme goal.
-  Establish custom frameworks for supplier sustainability and collect supplier data that's not yet covered by existing disclosure frameworks or systems.
-  Integrate sustainability management with the rest of the Vizibl platform, allowing you to attach projects, initiatives, and innovation opportunities to your programmes.
-  Create widgets & reports to gain visibility of performance at the individual supplier level, by framework, across a portfolio of suppliers, or for your entire programme.

Benefits

-  Gain increased visibility over supplier sustainability performance according to a variety of globally-recognised and custom frameworks, centralised in one location.
-  Save time manipulating and normalising extensive datasets from common disclosure system providers like CDP and SBTi thanks to out-of-the-box ratings in Vizibl.
-  Overcome slow updates to retrospective sustainability data by setting a roadmap of incremental targets plotting your course towards your established programme goal.
-  Measure, align, collaborate, and innovate all from one platform, and track suppliers' operational performance, innovation, and sustainability credentials side by side.
-  Gain actionable insights from robust reporting functionality, enabling you to identify areas for improvement & prove your progress towards sustainability goals.

About Vizibl

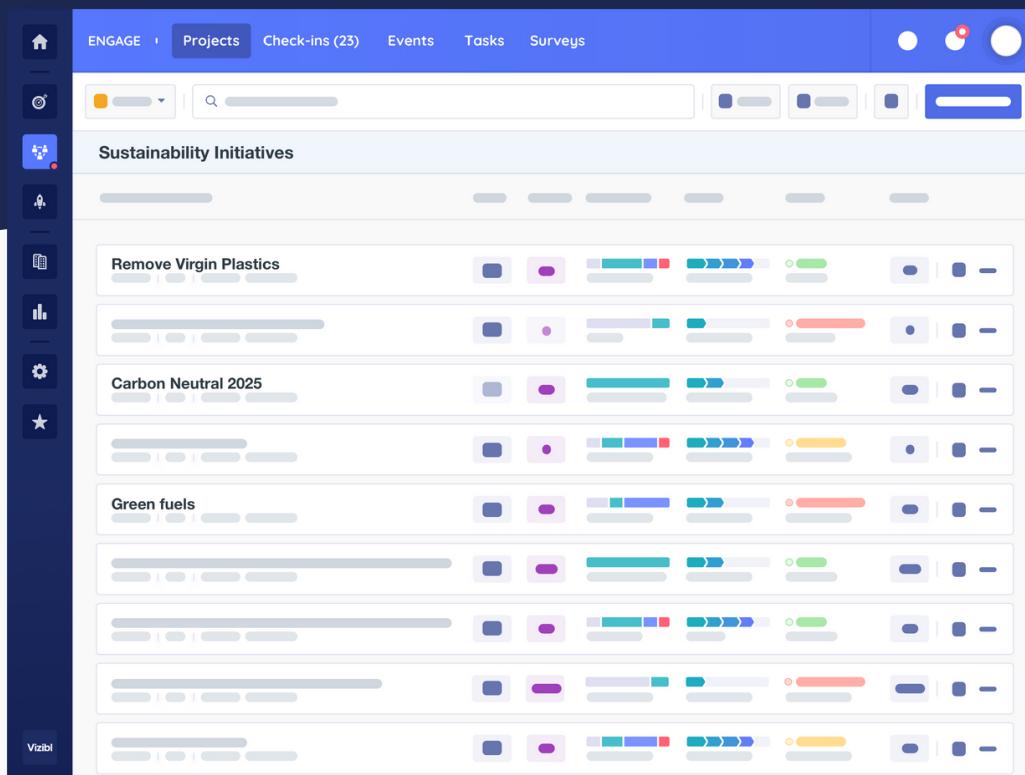

At Vizibl, we put collaboration, innovation, and sustainability at the heart of supplier relationships.

Our best-in-class digital platform enables enterprise organisations and their suppliers to manage every aspect of their relationship more effectively.

Whether it's discovering new revenue streams, developing innovative products and solutions, or taking joint action towards your sustainability targets, Vizibl helps to align your suppliers with your business goals to deliver mutual value.

Trusted by giants in pharmaceuticals, oil & gas, FMCG & communications, the Vizibl platform connects buyers and businesses with their suppliers, on every continent across the world.

Connect your extended ecosystem all in one collaborative platform, all Vizibl.
